World Cancer Congress - 2024

18th - 20th March, 2024 | New Delhi, India
JNU Convention Centre, New Delhi

Theme: Integrative Medicine and Translation Research in Cancer

SCIENTIFIC PROGRAMME

ORGANISED BY

CO-ORGANISED BY

ADVANCED . AFFORDABLE . ACCESSIBLE

ROBOTIC CARDIAC SURGERY

SSI Mantra, a cutting-edge, made in India robotic surgery system by SS Innovations, offers an affordable solution for advanced, minimally invasive procedures. Combining state of the art technology with cost-effectiveness, SSI Mantra revolutionizes the field of robotic surgery in India and beyond.

THE FUTURE OF DIGITAL HEALTHCARE

An advanced extended reality platform that revolutionizes surgical training and procedure optimization by harnessing the power of Mixed Reality and Artificial Intelligence.

Designed to offer immersive virtual and augmented reality experiences for peri-operative procedures.

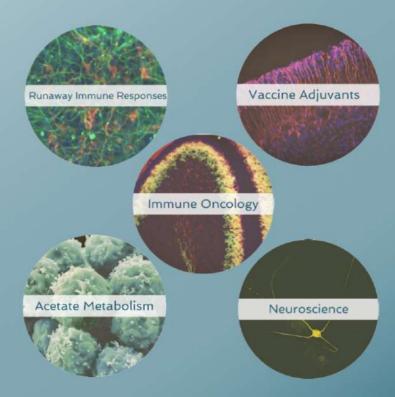

From Targets to Drugs

Curadev is a small molecule drug discovery and development biotech that uses a target-centric approach and classical medicinal chemistry to create new medicines.

We have an exciting portfolio of discovery programs against compelling first in-class drug targets. Our research programs have yielded patent protected drug candidates that have caught the attention of global pharma majors.

Areas of Interest

Our programs seek to ameliorate disease by translating cutting edge discoveries into new medicines.

Instruction for Invited Speaker

- + Invited Speaker will be allocated 13 minutes of effective presentation time, plus 1.5 minutes given to Q/A and 30 sec turnaround time between speakers.
- Authors must prepare their oral presentations to be sure to convey their message in clear and sharp manner, including giving outline of the key principles, facts and results. More detailed discussions can continue during the breaks.
- → Be considerate of other speakers and the audience by staying within your allotted time. Session moderators will hold you to the allotted time. This is essential to ensure adequate time for questions and discussion as well as adherence to schedule
- The speech can be prepared in Power Point(PPTx)
- + A laptop and a screen will be available in all conference rooms. Speakers are not allowed to use their own laptop computer, avoiding useless time breaks in between papers
- → Bring your presentation on a USB memory stick in MS-PowerPoint or Adobe PDF formats, and upload it in the WCC Help Desk no later than 120 minutes prior to your session start.
- → For 13 minutes of presentation, you can prepare around 10 (maximum 11) slides in PowerPoint, including the introduction and end slide.
- Please don't forget to take an extra copy of your presentation to New Delhi (USB-stick and/or send it to your Gmail/your Hotmail address).
- → Be sure that the PowerPoint slides have the same layout all way through.
- + Observe that the content of each slide is not too detailed.

Instruction for Oral Presenter

- + Oral presentations have been allocated 8 minutes of effective presentation time, plus 1.5 minutes given to Q/Aa nd 30 sec turnaround time between speakers.
- Authors must prepare their oral presentations to be sure to convey their message in clear and sharp manner, including giving outline of the key principles, facts and results. More detailed discussions can continue during the breaks.
- → Be considerate of other speakers and the audience by staying within your allotted time. Session moderators will hold you to the allotted time. This is essential to ensure adequate time for questions and discussion as well as adherence to schedule.
- + The speech can be prepared in Power Point(PPTx)
- + A laptop and a screen will be available in all conference rooms. Speakers are not allowed to use their own laptop computer, avoiding useless time breaks in between papers
- → Bring your presentation on a USB memory stick in MS-PowerPoint or Adobe PDF formats, and upload it in WCC Helpdesk Laptop 2 hours before the session
- → You can prepare around 8 (maximum 9) slides in PowerPoint, including the introduction and end slide.
- Please don't forget to take an extra copy of your presentation to New Delhi (USB-stick and/or send it to your Gmail/your Hotmail address).
- + Be sure that the PowerPoint slides have the same layout all way through.
- → Observe that the content of each slide is not too detailed.
- + Graphs and figures are often better than tables at an oral presentation. Flow charts are very appropriate to describe material.
- + If you wish to add films or other sorts of interactive materials, please include these in the presentation (do not access them through internet, as this may not work to your satisfaction)

Instruction for Poster Presentations

- + The maximum dimension of poster should be Length: 3 feet, Width: 2 feet, It should be printed in Paper or get printed in flex.
- + Posters usually have a similar structure to a research paper or journal article: an abstract, introduction (i.e., brief rationale or review of relevant research), method section, results section, and a conclusion or summary. You might also want to list key references. If your poster is more clinically oriented, you may decide to use a different format, but breaking things down into clear sections with headings will help your colleagues understand your poster easily and quickly. In the busy and crowded environment of a poster session, most people do not have the ability to read and process long sections of text. Therefore, keep text to the bare essentials and stick to the most important ideas. You can convey details via discussion when you are standing by your poster.
- + The title of your poster presentation and your name should be made in very LARGE type so that viewers can easily see the subject matter of the poster and its author from a distance (at least 1" lettering, or 36 points font). The title, author's name, and author's affiliation are usually placed at the top and in the centre of the poster board. The poster should also contain the poster number.
