# Automated sample preparation

From tissue dissociation to flow cytometry

**Reduce manual tissue dissociation and flow cytometry preparation steps with the VIA Extractor™ tissue disaggregator and the CellMek SPS system from Beckman Coulter.**

The VIA Extractor\* tissue disaggregator dissociates solid tissue into viable single cells. For use in high-throughput omics and flow cytometry research, the closed system uses mild processing to optimize yield and preserve content relative to the parent sample.

The CellMek SPS system helps you unlock the power of lean by addressing major process wastes related to sample preparation in your clinical flow cytometry laboratory.

## **Instruction for Invited Speaker**

- ✦ Invited Speaker will be allocated 13 minutes of effective presentation time, plus 1.5 minutes given to Q/A and 30 sec turnaround time between speakers.
- ✦ Authors must prepare their oral presentations to be sure to convey their message in clear and sharp manner, including giving outline of the key principles, facts and results. More detailed discussions can continue during the breaks.
- ✦ Be considerate of other speakers and the audience by staying within your allotted time. Session moderators will hold you to the allotted time. This is essential to ensure adequate time for questions and discussion as well as adherence to schedule
- ✦ The speech can be prepared in Power Point(PPTx)
- ✦ A laptop and a screen will be available in all conference rooms. Speakers are not allowed to use their own laptop computer, avoiding useless time breaks in between papers
- ✦ Bring your presentation on a USB memory stick in MS-PowerPoint or Adobe PDF formats, and upload it in the WCC Help Desk no later than 120 minutes prior to your session start.
- ✦ For 13 minutes of presentation, you can prepare around 10 (maximum 11) slides in PowerPoint, including the introduction and end slide.
- ✦ Please don't forget to take an extra copy of your presentation to New Delhi (USB-stick and/or send it to your Gmail/your Hotmail address).
- ✦ Be sure that the PowerPoint slides have the same layout all way through.
- ✦ Observe that the content of each slide is not too detailed.

## **Instruction for Oral Presenter**

- ✦ Oral presentations have been allocated 8 minutes of effective presentation time, plus 1.5 minutes given to Q/A and 30 sec turnaround time between speakers.
- ✦ Authors must prepare their oral presentations to be sure to convey their message in clear and sharp manner, including giving outline of the key principles, facts and results. More detailed discussions can continue during the breaks.
- ✦ Be considerate of other speakers and the audience by staying within your allotted time. Session moderators will hold you to the allotted time. This is essential to ensure adequate time for questions and discussion as well as adherence to schedule.
- ✦ The speech can be prepared in Power Point(PPTx)
- ✦ A laptop and a screen will be available in all conference rooms. Speakers are not allowed to use their own laptop computer, avoiding useless time breaks in between papers
- ✦ Bring your presentation on a USB memory stick in MS-PowerPoint or Adobe PDF formats, and upload it in WCC Helpdesk Laptop 2 hours before the session
- ✦ You can prepare around 8 (maximum 9) slides in PowerPoint, including the introduction and end slide.
- ✦ Please don't forget to take an extra copy of your presentation to New Delhi (USB-stick and/or send it to your Gmail/your Hotmail address).
- ✦ Be sure that the PowerPoint slides have the same layout all way through.
- ✦ Observe that the content of each slide is not too detailed.
- ✦ Graphs and figures are often better than tables at an oral presentation. Flow charts are very appropriate to describe material.
- ✦ If you wish to add films or other sorts of interactive materials, please include these in the presentation (do not access them through internet, as this may not work to your satisfaction)

# **Instruction for Poster Presentations**

- ✦ The maximum dimension of poster should be of maximum Length: 3 feet, Width: 2 feet, It should be printed in Paper or get printed in flex.
- ✦ Poster needs to be fixed in the Poster Board before 09:00 AM and can be removed after 5 PM.
- ✦ Poster needs to be get fixed with the help of Double Tape or Transparent Cello Tape, Presenter are requested to bring their own Cello Tape or Double tap to fix the poster at the Poster Board.
- ✦ Kindly take help of our volunteer to fix the Poster at the Poster Board.
- ✦ All Presenter are requested to be present during the evaluation time.
- ✦ Posters usually have a similar structure to a research paper or journal article: an abstract, introduction (i.e., brief rationale or review of relevant research), method section, results section, and a conclusion or summary. You might also want to list key references. If your poster is more clinically oriented, you may decide to use a different format, but breaking things down into clear sections with headings will help your colleagues understand your poster easily and quickly. In the busy and crowded environment of a poster session, most people do not have the ability to read and process long sections of text. Therefore, keep text to the bare essentials and stick to the most important ideas. You can convey details via discussion when you are standing by your poster.
- ✦ The title of your poster presentation and your name should be made in very LARGE type so that viewers can easily see the subject matter of the poster and its author from a distance (at least 1" lettering, or 36 points font). The title, author's name, and author's affiliation are usually placed at the top and in the centre of the poster board. The poster should also contain the poster number.
